

A photograph of a massive wildfire in a tropical forest. In the foreground, a large, gnarled tree trunk stands on the left, and a palm tree is on the right. The ground is covered in intense orange and yellow flames. Thick white and grey smoke billows upwards, partially obscuring the sky and the trees in the background. The sun is visible through the smoke in the upper center, creating a hazy, golden light. The overall scene is one of a devastating natural disaster.

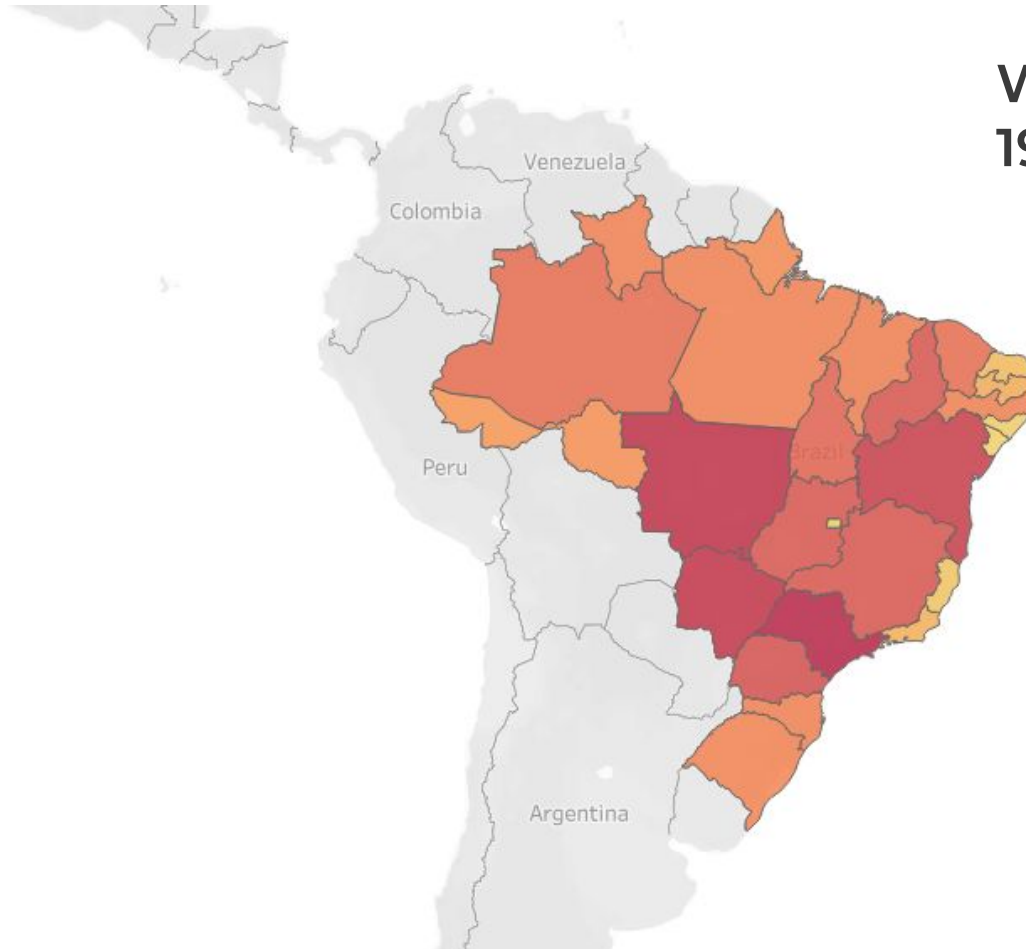

Wildfires in Brazil

How has the
number of wildfires
changed over the
years?

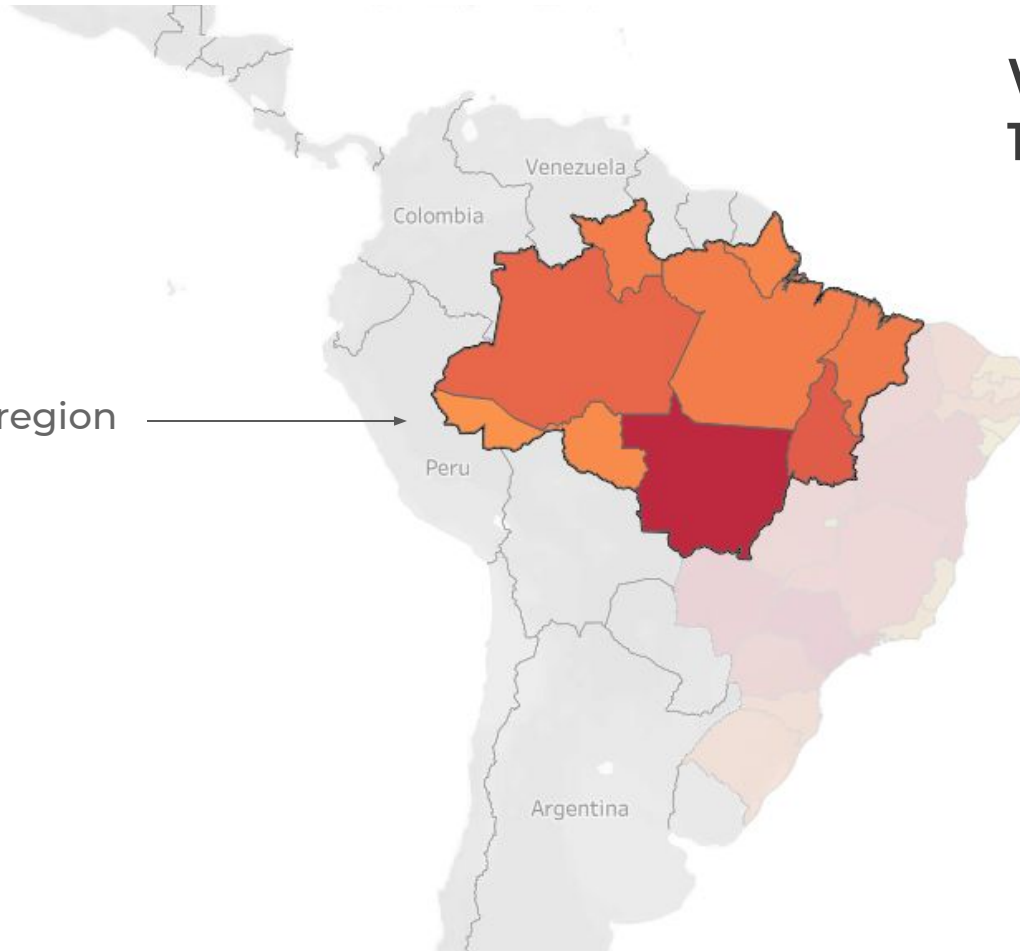

Why?

Wildfires in Brazil 1998-2017

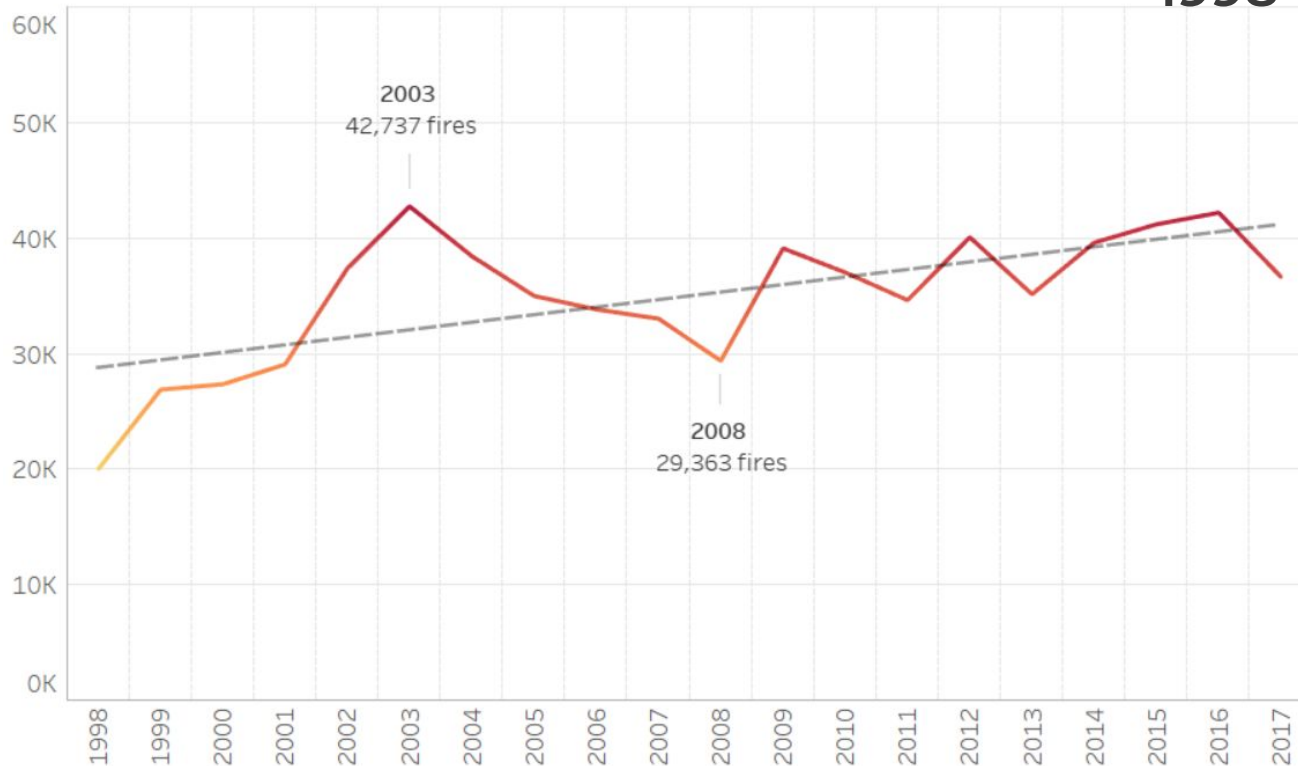

Wildfires in Brazil 1998-2017

Amazon region

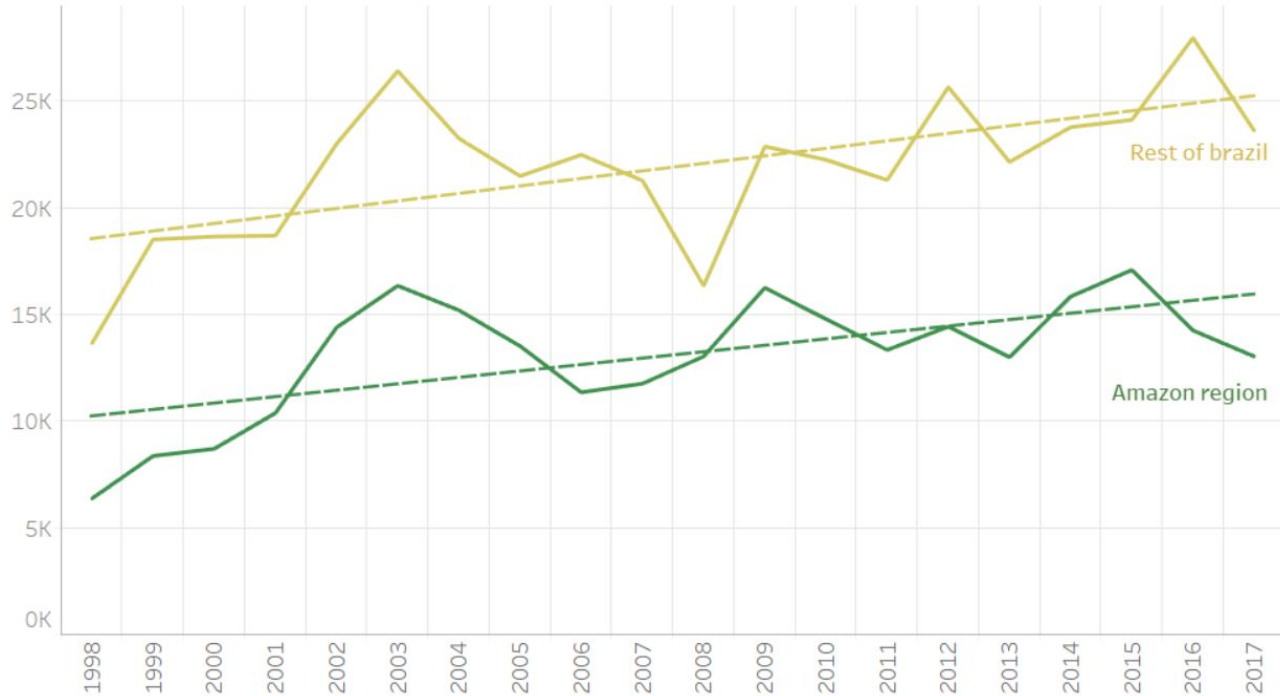

Increasing trend over the years 1998-2017
